

We show our school!

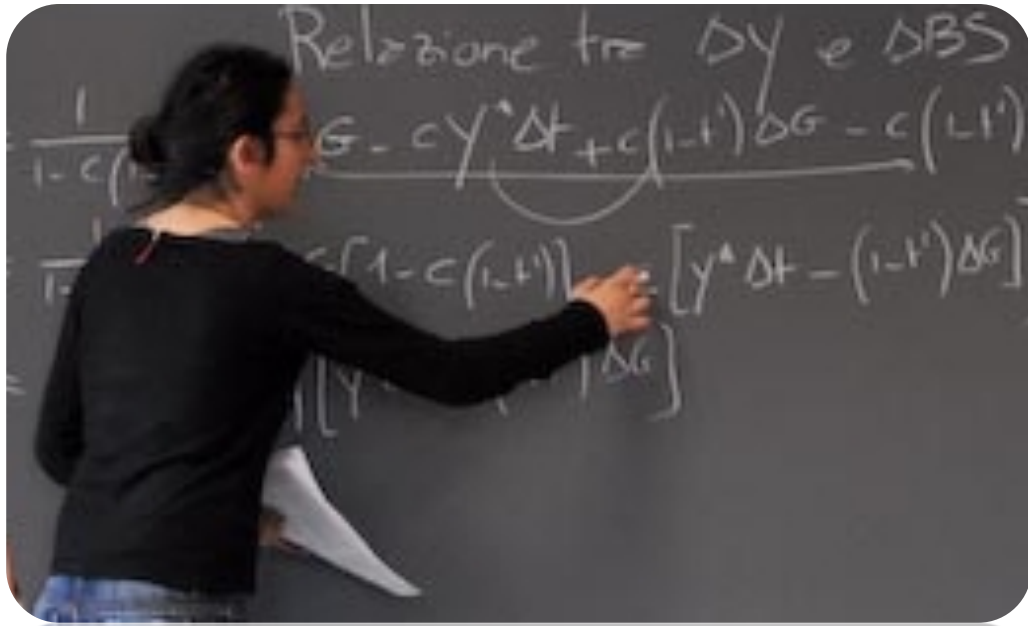

Where is it?

We come from Italy and *our school is in Turin, that is the county seat of Piedmont. Turin is famous for its monuments, for example the Mole Antonelliana, but also for Egyptian Museum, for Valentine's park and for Venaria's Reggia.*

Many interesting things to see...

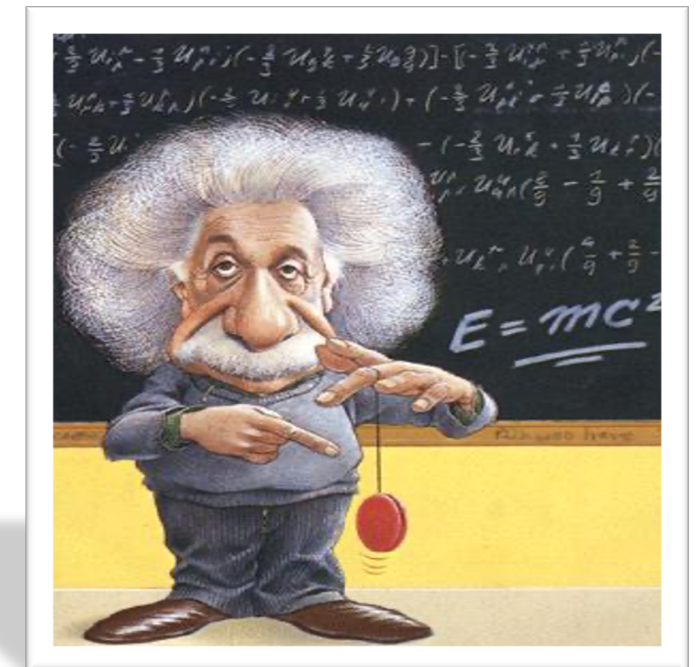

It's a beautiful city full of charming squares like Vittorio Square, famous street like Rome street and many good restaurants and shops. There are also popular Art Galleries.

Our school...

It is near the centre of the city and it's one of the best school in Turin because it offers an excellent preparation in education that allows you to continue studying at the university. Our school is a high school with four study courses: scientific, linguistic and human sciences.

Our laboratories...

There are many laboratories: biology, physics and chemistry. Finally we have two gyms and one library.

New teaching proposal!

Starting from 2017, the high school has a new training offer, called science high school for Europe: where students are trained in advanced French and scientific English.
